

Angled Cables

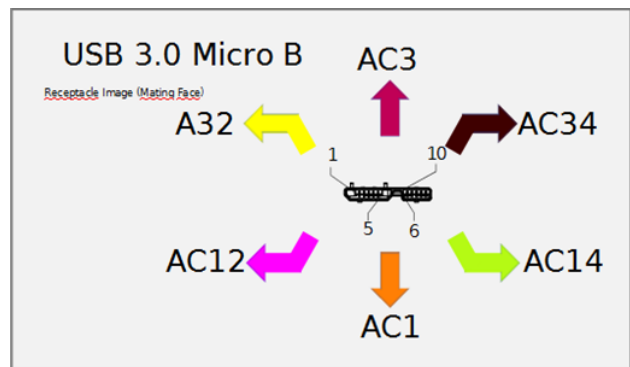

Introduction

The old angled cables usually were named AK90. This is going to be changed to the designations with AC1, AC2, AC3, AC4.

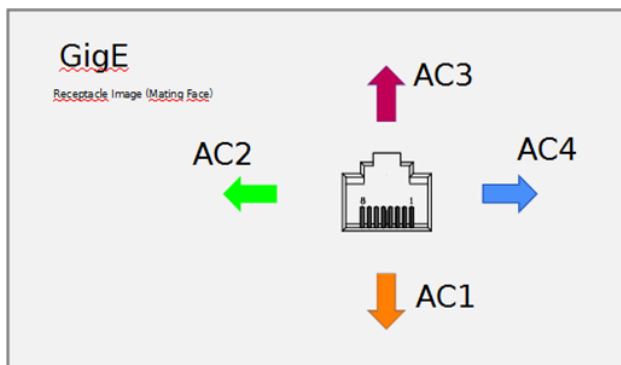

Technical specification

Example USB 2.0 → mvBlueFOX-IGC: AC4 significance the cable is right angle if you look to the connector of the camera.

Example USB 3.0 → mvBlueFOX3: AC14 significance the cable is left angled if you look to the connector of the camera.

Example RJ45 → mvBlueCOUGAR-X: AC4 significance the cable is angled to the top if you look to the connector of the camera.
