

**Mounting Instructions:**

- 1) **Screw the Sensor into the holder until it bottoms out.**
- 2) **Attach the BCC cable.**
- 3) **NOTE: The Sensor Holders are equipped with magnets used to keep the Holders together while the sensors are transmitting data.**
- 4) **NOTE: When coupling the Holders for data transfer the 6 screws on each Holder must be aligned, or it will feel like the magnets have reverse polarity. Once the screws are aligned, use caution as the magnets are powerful and can pinch coming together.**
